

# Luis Cortes

## Software Engineer

Software Engineer with 2 years of experience building complete web applications. Passionate about developing scalable and clean code. Specialized in JavaScript technologies like Next.js, Node.js and SQL, and NoSQL databases. I'm currently working for a Property Management Company with more than 400 properties and looking to work with international companies with new challenges and opportunities.

## Work History

**2020-12 -  
Current**

### Full Stack Developer

*Hostpal, Mexico City*

- Reviewed code, debugged problems and corrected issues.
- Improved by 70% website performance using Next.js, through refactoring and redesigning legacy code.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Improved company billing system which reduced transaction fees by 15% per month.
- Transform company requirements into fully functional products using proper technologies and practices.
- Increased earnings by integrating new vacation rental channels and using rental data & analytics services.

**2020-04 -  
2020-06**
